## Paint Your Own Pots

Place a messy mat, old cloth or newspaper over your work surface. It is recommended that you wear an art smock to protect your clothing from paint splashes.

1. Plan your design before you start. Paint lighter colours then darker colours and allow to dry between colours. Wash your paintbrush with water when changing colours.

2. When the paint is dry, your pots are now ready to plant your plants (not included).

Note: Pots are made of porous material. We recommend sealing the inside of pots and using a saucer with them (not included).
