

# Instruction Manual:

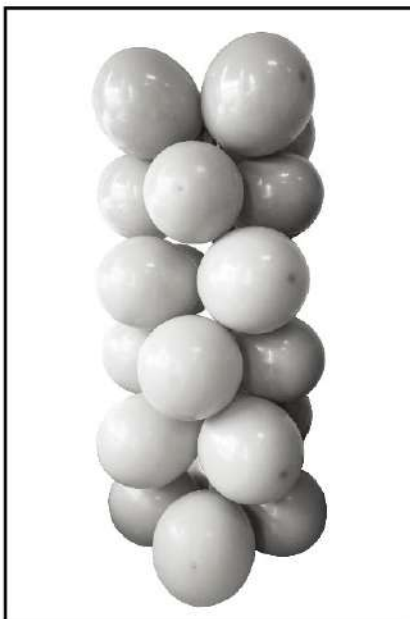

**IMPORTANT: Adult Assembly is required. DO NOT over inflate the balloons. Use of pump to fill the balloons is recommended.**

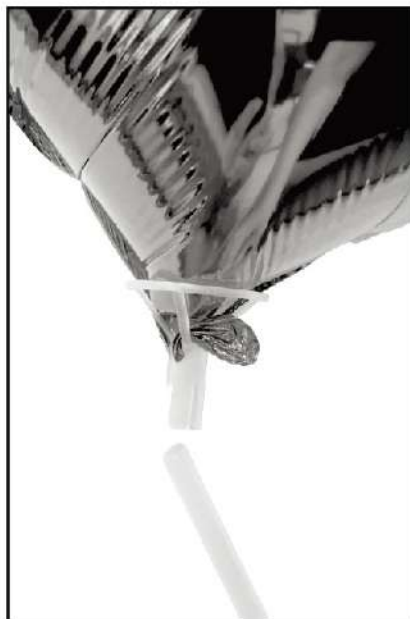

Step 1. Connect the 4 tubes and insert to the base. (The base can be filled with water, if required, to keep the column sturdy.)

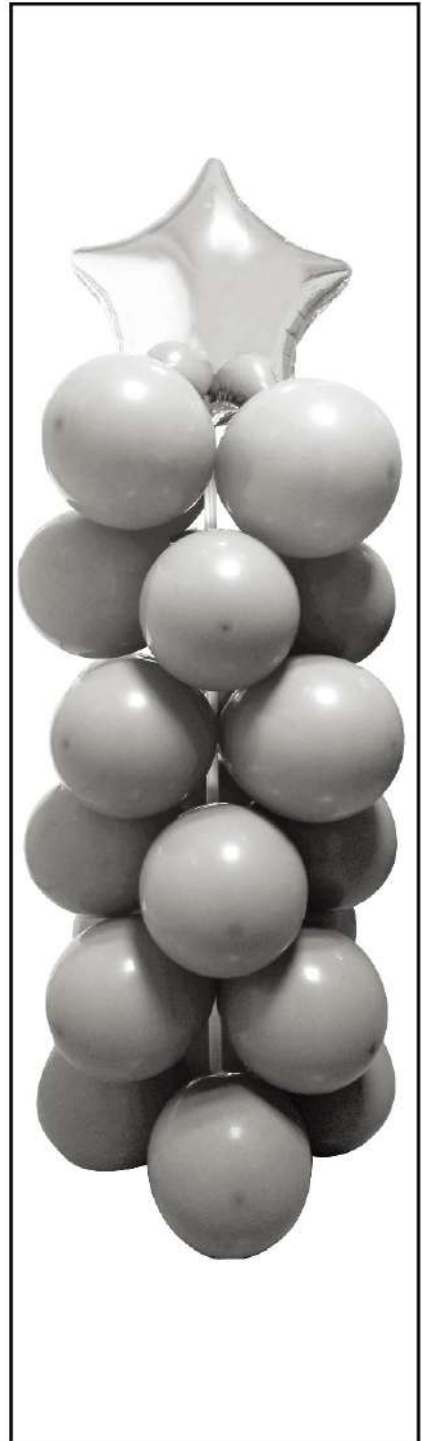

Step 2. Inflate the latex balloons and seal tight with a knot. Then gently insert the knot of the balloons into the round holder (carefully ensuring not to puncture the balloons). Each round holder holds 4 balloons in total.

Step 3. One by one, slide the 6 round holders, with their 4 balloons, onto the tube column. (You can choose to follow the colour-block design or come up with your own!) You should now have a column of balloons. 6 balloon holders with 4 balloons each.

Step 4. Next, inflate the foil balloon and insert into the single balloon holder, make sure the tail of the foil balloon is wrapped securely around the small clasp. Then insert the single balloon holder into the balloon stick.

Step 5. Insert the balloon stick with balloon into the top of the column to finish.
