

# Paint Your Own Flower Pots 3 Pack

8+  
years

## Instructions

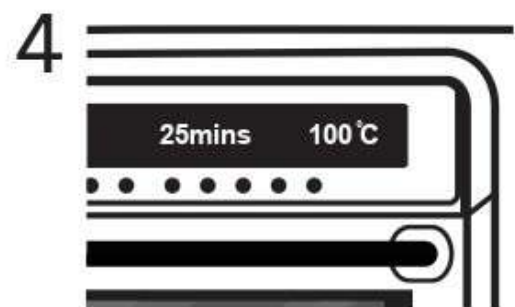

Clean the cement flower pots and tray with a cloth, then paint on them with the paintbrush.

After you have finished painting, dry the flower pots and tray for 24 hours.

Place the flower pots and tray in an oven (normal gas or electrical), but NOT a microwave.

Heat the flower pots and tray in the oven with the temperature of 100°C / 212°F for around 25 minutes. Do not take it out immediately.

After cooling off, take the flower pots and tray out of your oven.

Your flower pots are now complete!

## PREPARATION:

1. Wear a protective apron at all times.
2. Refer to the packaging box as inspiration when painting, or create your own design.
3. Use newspaper or a protective cover on your work area before you start painting.
4. Keep the paint lids closed after use.
5. Thoroughly wash the paint brush with water after each use and before dipping it into another paint tub.

## CAUTION:

1. Before you place the flower pots in the oven, ensure they have dried for 24 hours after you have finished painting. Paint colours will be dull if they are not completely dry.
2. Ensure to let your flower pots cool down before removing them from the oven as they will be very hot.
3. Only use a normal gas or electrical oven, NOT a microwave.

## TIPS:

1. Add a couple of drops of water to any paint that may look dry or sticky.
2. Mix different paints together to create new colours.
3. If you make a mistake when you are painting, just wipe the paint off by tissue or wash the flower pots. The paint cannot be washed or wiped off easily after baking.
4. Allow the flower pots to cool completely before use.

## NOTE:

Mixing white and other colours will make a close shade to pastel colours.
