INSTRUCTION SHEET

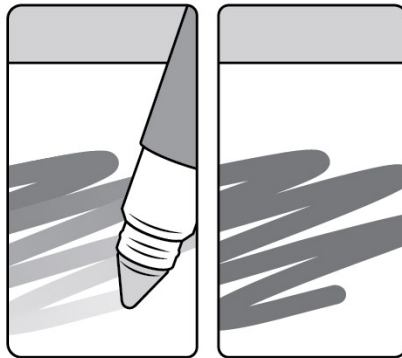

Here are some tips and tricks for unlocking the wonder that is Clean Colouring™ technology! Please work on a flat surface with good lighting and follow this sheet to ensure the best results.

MARKERS

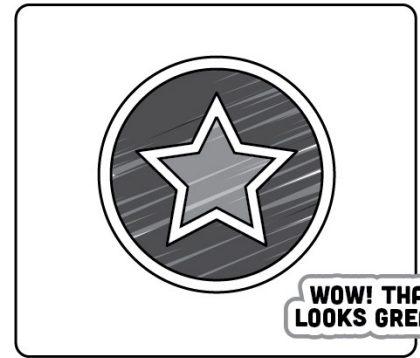

Clean Colouring™ magic markers will only colour on Clean Colouring™ magic marker pages!

1. For each section, colour slowly and carefully in a single layer for even pigment.

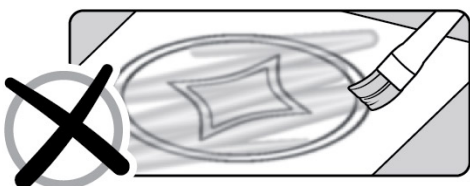

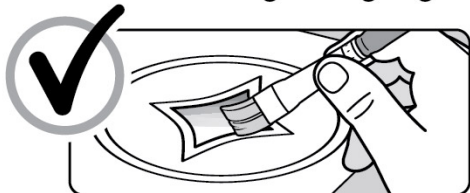

2. After colouring, the pigment will magically become more vibrant over time!

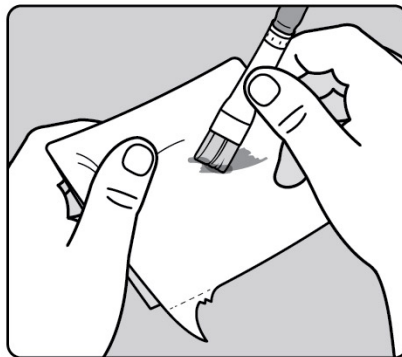

3. Complete colouring each section, then display your amazing new artwork!

GEL

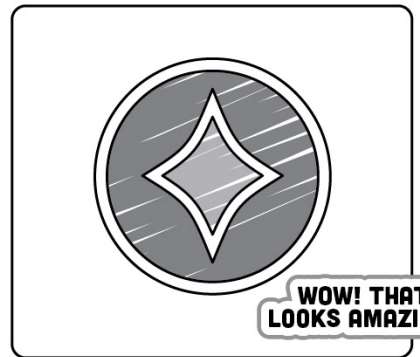

Clean Colouring™ magic gel will only colour on Clean Colouring™ magic gel pages!

1. Use a small amount of magic gel and paint each section, avoiding the black lines.

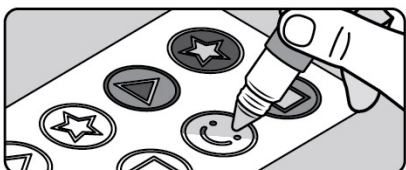

2. Wipe your brush through a paper towel to get rid of any pigment.

3. Complete painting each section, then display your incredible new artwork!

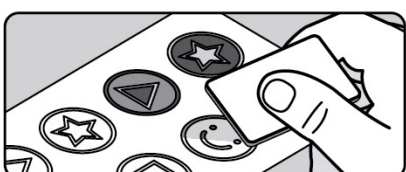

STICKERS

Reveal Clean Colouring™ sticker colours in one of two ways!

Colour using the magic markers for maximum vibrancy

OR

Scratch the surface with a thick piece of plastic or paper for a pastel look
