Product Introduction

This is a multi-functional science toy which combines projection and speech to introduce the solar system. It aims to enhance children's understanding of the eight planets and cultivate their interest in astronomy and space exploration.

Warnings & Cautions

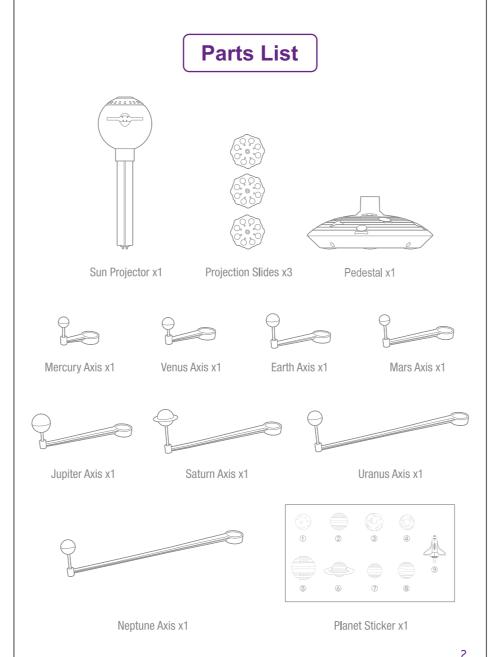

WARNING: ALL PACKAGING MATERIALS, SUCH AS TAPES, PLASTIC SHEETS, BIND-ING WIRES AND LABELS, ARE NOT PART OF THE PRODUCT AND ARE NOT SUITABLE FOR CHILDREN TO PLAY WITH, FOR THE SAFETY OF YOUR CHILD, PLEASE HANDLE PACKAGING MATERIALS PROPERLY. THE USER MANUAL CONTAINS IMPORTANT INFORMATION, PLEASE KEEP IT FOR LATER USE.

CUITED.REMOVE BATTERIES FROM THE TOY WHEN NOT IN USE FOR EXTENDED TIME OR WHEN BATTERIES BECOME EXHAUSTED.BATTERY INSTALLATION BY AN ADULT IS REQUIRED. DISPOSE OF BATTERIES RESPONSIBLY.DO NO DISPOSE OF IN FIRE.

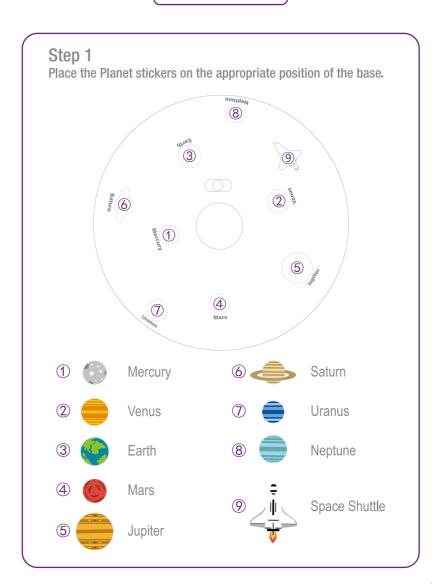

MARNING CHOKING HAZARD-SMALL PARTS. NOT FOR CHILDREN UNDER 3 YEARS.

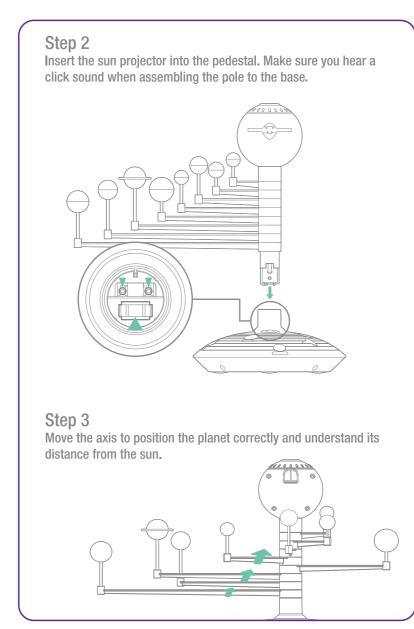

DO NOT LOOK DIRECTLY INTO THE LENS LIGHT.

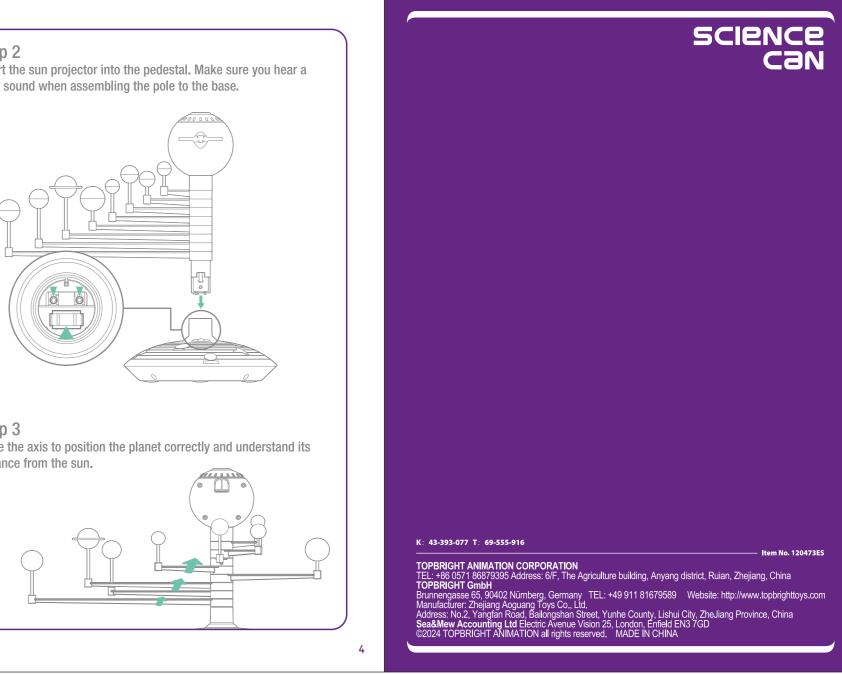

CAUTION: ADULT ASSEMBLY AND SUPERVISION REQUIRED.

Assembly

- 1. Make sure the switch is off, open the battery box at the bottom of the base with a screwdriver (not included).
- 2. Insert three new 1.5V AA batteries (not included) into the slot with the correct polarity
- 3. Put on the cover and tighten the screw.

Maintenance

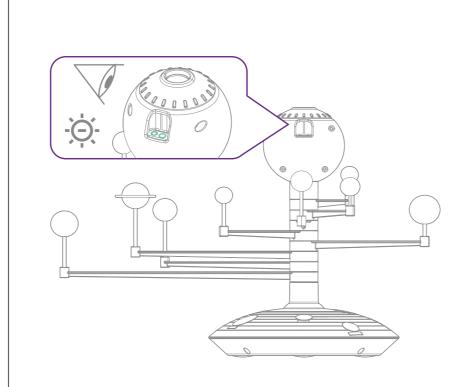

- 1. Wipe the outside of the main machine with a soft dry cloth to keep the machine clean.
- 2. Avoid direct sunlight and keep away from any heat sources.
- 3. Remove the battery, when not in use for a long period of time.
- 4. Avoid confiding with hard objects and disassembling.
- 5. Do not immerse the main machine in water and avoid damp environments.

Common Trouble Shooting

- If for any reason the host stops responding, please follow these steps: 1. Switch off the host.
- 2. Remove the battery to interrupt the power supply.
- 3. Leave the machine for several minutes and then reload the battery.
- 4. Reboot and turn on.
- 5. If the machine is still not working, please install new batteries.

Eye Protection Function

The eye protection function will be triggered when children look into the light source, the lens light will dim to protect children's eyes.

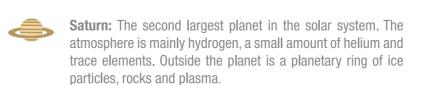

1. Switch the button to the left to choose English. Touch one of the planets on the pedestal to have the introduction.

Instruction

- Mercury: The smallest planet, and closest to the sun and the fastest moving planet. It's the planet with the largest temperature difference between day and night in the solar system.
- Venus: The brightest planet and the only one without a magnetic field in the solar system. The surface temperature is very high, no liquid water, there is little possibility of life.
- **Earth:** At present, this is the only known celestial body with life in the universe. Mainly composed of land and sea, it is the home of millions of creatures.
- Mars: Desert planet .The surface made up of sand dunes, gravel, and no liquid water. The atmosphere is mainly carbon dioxide. A feature of the southern highlands and northern

Jupiter: The largest and fastest rotating planet in the solar system. The atmosphere is mainly hydrogen, and it's a huge liquid hydrogen planet.

- Uranus: The coldest planet in the solar system, the lowest temperature can be -224° c. The atmosphere is mainly hydrogen, helium and methane.
- **Neptune:** The farthest planet in the solar system. The atmosphere is mainly hydrogen and helium with traces of methane.

2. Choose one projection slide and insert it into the sun projector. Rotate the slide to change the image, adjust the image clarity by turning the top lens clockwise or anti-clockwise,
