

UMBRELLA TO GAZEBO NET INSTRUCTIONS

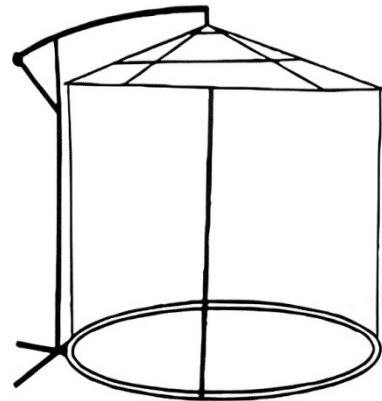

Keycode: 43398874

Please read completely before setting up your umbrella to gazebo net.

Suitable for Various Umbrella Types

1. Mid-column Umbrella

2. Bent arm umbrella

3. Awning

Warm Tips:

1. When stowing the net, drain the water in the bottom of the tube, and wait until it is completely dry before putting it away.

2. Please put the nets away in strong winds or heavy rains weather.
3. There's a rope buckle at the top of the mesh to regulate the netting size to fit the umbrellas in 7.5ft to 10ft diameter.

4. There are zipper heads in both sides for easy access.
5. Upgrade PVC quality water pipe, more durable, and last long life.
6. Filling the tubes along the base with water to help keep the screen stable.

**WARNING: KEEP AWAY FROM FIRE. NOT TO
BE USED AS A PERMANENT STRUCTURE.**

How to Install:

- (a) Untie the zipper top end and the cord lock, so it fully opens like a coat.
- (b) Open the umbrella, adjust the height that suits you.
- (c) Get a handful of clothes pegs and clip the top end of the mesh to the umbrella.
- (d) Close the zipper top of the netting and the cord lock, then adjust the rope length to fit the umbrella (7.5"~10").
- (e) Fill the tube with water to keep the netting secured.
- (f) Adjust the umbrella height and the netting rope to make the net and the umbrella a perfect fit.
