

DIY Paper Flowers Kit Instruction Manual

Kit Includes

- > 7 x crepe paper colours
- > 4 x wire stems
- > 5 x shape templates
- > 1 x glue
- > 1 x green tape
- > 1 x instruction sheet

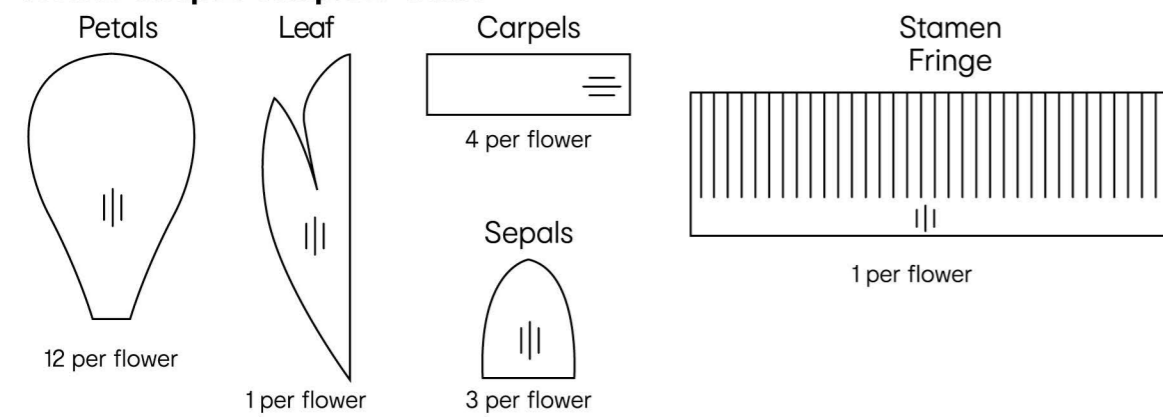

Tips

- > Each flower requires 12 petal shapes, 1 yellow stamen fringe shape, 1 green leaf shape, 4 green flower carpel shapes and 3 green flower sepal shapes.
- > A hot glue gun is recommended to speed up the drying time. Ensure glue is dry before handling.
- > Mix and match colours to create new colour combinations.
- > Pre-cut flower shapes using the templates and guide below. To maximise the crepe paper, cut shapes closely to each other.

Flower Shapes Template Guide

How To Make A Paper Flower

1

Use the flower shape templates provided to cut the petals, leaf, carpels, sepals from the crepe paper.

2

Roll the top of the petals over a pencil or similar object to create a natural curved petal shape.

3

To cup a petal, pinch it between your thumbs and forefingers. Gently pull thumbs outward to stretch the crepe paper, opening up ridges. This will cup it inward into a concave shape.

4

To make the flower center, take 4 green rectangle carpel shapes. Twist them tightly between your fingers and bend them in half. Glue the ends of each together and attach all strips to the wire stem.

5

Cut one stamen yellow fringe shape. Cut tiny slits along one side.

6

Attach the fringe to your flower centre with glue and continuously wrap it around. Secure with glue.

7

Gently gather and pleat the bottom edge of the petals and shape them to cup inwards slightly. Attach 3 petals for the 1st layer using glue.

8

Continue adding all 12 petals on top of one another to create layers. Tips: 4 petals for the 2nd layer and 5 petals for the last layer.

9

Glue 3 sepals to the base of flower head.

10

Wrap green tape around the wire stem and attach a leaf. Secure with glue.

11

The flower is complete. Continue with remaining crepe paper to make 3-4 flowers, then display them in a vase or bouquet.
