- 6. Disposable gloves x 2
- 7. Lavender essential oil x 1

EXTRA ITEMS YOU WILL NEED

- > Plastic sheets to protect your work surface
- > A stovetop and heat safe dish or saucepan to heat the wax

CREATING A GLASS CANDLE

Makes 2 glass candles

Tips:

Read through instructions before starting.

1x glass requires 1 equal portion of soy wax (or 200g of soy wax).

1. Thread the candle wick through the hole in the middle of the wooden candle wick holder and place in the middle of the glass. (Fig. 1)
2. Put on the supplied disposable gloves and begin making your candle.
3. Divide soy wax into two equal parts and pour one portion into a heated dish. Stir with the wooden muddler. Heat mixture until completely melted. (Fig. 2-3)
4. Add the lavender essential oil, ensuring to stir continuously. (Note: the more drops added the stronger the smell will be. 3-4 drops are recommended.)
5. After ensuring there are no bubbles present in the wax liquid (Note: you can use a thermometer to measure the temperature of the wax liquid, which needs to be heated to 70-80 degrees Celsius.) pour wax slowly into the prepared glass. (Fig. 5-6)
6. Wait 3-4 hours until the wax has completely hardened, then remove the candle wick holder.

Repeat the steps above to make a second glass candle.
