- › 1 × mixing bowl
- › 1 × sponge
- › 1 × wooden stick
- › 1 × instruction sheet

Guide Image

Tips

- › Clean the wooden base & tiles with a damp cloth before beginning.
- › Cover the work area with disposable paper or a mat.
- › Keep the gaps between tiles approximately 3mm or less.
- › Ensure grout is completely dry before using coaster.

How To Make A Mosaic Coaster

Place the tiles on the wooden base in your desired pattern, leaving small gaps between tiles.

Glue each tile onto the base and allow approx. 30 minutes for the glue to dry.

Pour the grout into the mixing bowl. Gradually add water while stirring until it forms a paste texture. 1 bag of grout requires approx. 40ml of water.

Using the scraper, apply the grout to cover the tiles completely. Spread the grout to fill all of the gaps. Scrape off excess grout from the top of the tiles.

Wet the sponge with warm water and clean the tiles until they are clear of grout, leaving grout only in the gaps. Allow approx. 5 hours for the grout to dry.

Clean off any remaining grout. Then the mosaic coaster is complete and ready for use. Continue to make 3 more coasters following the steps above.
