Chinese Checkers

4+
years

2-6
PLAYERS

INCLUDES:

- 1 gameboard
- 60 coloured pieces

INSTRUCTIONS:**SETUP:**

Select a colour and then place the 10 playing pieces of that colour into the holes in the triangle directly in front of you.

Move by placing a playing piece in an adjacent hole or by jumping another playing piece to the empty hole right beyond it.

- You may jump your own playing pieces.
- You may move a playing piece into the triangles of other players or triangles not being used.
- Only one move may be made at a time, except when jumping - then any number of jumps may be made in a straight line or zigzag pattern.
- At no time are any playing pieces removed from the board.
- Eventually, all playing pieces must be moved regardless of whether one player wants to block another player's move.
- Once a playing piece reaches the opposite triangle, it may not be moved out of the triangle, only within it.

LET'S PLAY:

Youngest player goes first.

1. Take turns moving your playing pieces one space at a time unless a jump may be made, then you may make multiple moves.
2. Jumps may be made in a straight line or zigzag pattern.

TO WIN:

Be the first player to move all 10 of your playing pieces into the triangle directly opposite your starting point.
