

Shrink Art Craft Kit - Instructions

1. Colouring: Select the Shrink Art charm of your choice. Using the coloured pencils, customize your charm by colouring on the rough side.
2. Baking: Line a baking tray with non-stick aluminum foil or baking paper. Place your designs on the baking tray with the rough sides facing up. Leave space between each design to prevent charms from sticking together.

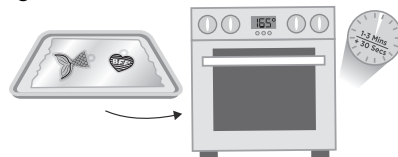

5+
years

Conventional Oven Should Only Be Used With Adult Supervision

3. Preheat conventional oven to 165 degrees Celsius. Once preheated, place the baking tray with your designs into the oven and bake for 1 to 3 minutes.
4. Your designs will curl up during the baking process, but will then flatten themselves out. Bake for an additional 30 seconds once the charms have flattened out.

5. Remove the tray from the oven using an oven mitt for safety. Let your designs cool for a few minutes before handling. Your finished designs will shrink to 1/3 their original size and will be 9 times thicker!
6. Create your own custom keychains by attaching your charms to jump rings, then looping them onto the keyrings and clasps. Add your own style with cord, tassels, beads and sequins. The possibilities are endless!
