

# Brief Introduction

## Tips of glue (The picture is only for reference.)

1. Liquid glue is used to glue large wood parts and other materials.
2. Do not use too much glue in case of longer time to dry. It may also affect the appearance of completed products.

Liquid glue

## Tips of assembling

1. Small parts are included. Children must assemble under the guidance of adults in case of swallowing by mistake.
2. Put the remains back to original bags after taking enough dosage in each step till completed. (In case of missing materials)
3. All the dimension in the instruction is shown in millimeter (mm).
4. Find the part you need according to material list and the 1:1 part illustration paper (for wood parts). Check its number and size carefully before assembling. See Part Number Explanation at the end of this page.

## Tools included

## Tools not included

## Remove the part properly

Remove the wood part with knife. Polish with sandpaper for preparation. (It's easier to remove parts by cutting the edge front and back.)

## Find wood parts based on the part illustration paper

1 Find part number paper in the box.

2 Put the part in parts number paper to know parts number.

## Part number explanation

3-B1: Parts in bag No.3, the number of the part is B1. (Only note the part number in the steps.)
