# Brief Introduction

## Tips of glue (The picture is only for reference.)

1. Liquid glue is used to glue large wood parts and other materials.
2. Do not use too much glue in case it's hard to dry. It may also affect the appearance of the completed products.

Liquid Glue

## Tips of assembling

1. Small parts are included, children must assemble under the guidance of adults in case of eating by mistake.
2. Put the remains back to original bags after taking enough dosage in each step till completed. (In case of missing materials.)
3. All the dimension in the instruction is shown in millimeter. According to the [Part number explanation] at the end of this page, find the real part based on the part illustration paper and check the size carefully. Start to assemble after verification. (Only for wooden parts.)
4. Note which bags the parts kept in based on the material list when assembling and taking them out to use.

## Tips of light bead

1. Take the picture on the right: Note the anode and cathode of the light bead. Connect the yellow wire to the anode and the white wire to the cathode.
2. The red wire in the cell box is anode and the black wire is cathode.
3. Test if the light works again after assembling the lampshade and the cell box.

## Tools included

## Tools excluded

## Explanation of green crumpled paper (Units: mm)

Please cut the green paper strictly based on the suggestive size.

- !** Part number explanation **A1** is in Bag No. GH001, the number of the part is **A1**. (Only note the part number in the steps. Some spare parts are included, subject to parts needed in practical steps.)

## Make a proper use of part number graph

1. Find the part illustration paper which is placed separately in the box.
2. Compare the part with the illustration paper to help find the part number.

## Make a proper remove of the wood part

Remove the wood part with the utility knife. (Cutting the both sides of the wood piece will make it easier to get the part.)

## Paint the part

Paint the side and back of **E2** white in advance and dry for preparation. (Paint again after dry for better effect.)
