Brief Introduction

Tips of glue (The picture is only for reference.)

1. Liquid glue is used to glue large wood parts and other materials.
2. Do not use too much glue in case it's hard to dry. It may also affect the appearance of the completed products.

Liquid Glue

Tips of assembling

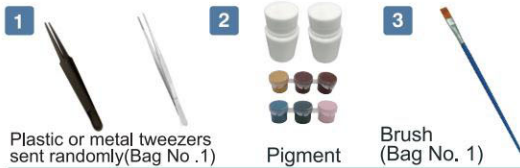

1. Small parts are included, children must assemble under the guidance of adults in case of eating by mistake.
2. Put the remains back to original bags after taking enough dosage in each step till completed. (In case of missing materials.)
3. All the dimension in the instruction is shown in millimeter. According to the [Part number explanation] at the end of this page, find the real part based on the part illustration paper and check the size carefully. Start to assemble after verification. (Only for wooden parts.)
4. Note which bags the parts kept in based on the material list when assembling and taking them out to use.

Tips of light bead

1. Take the picture on the right: Note the anode and cathode of the light bead. Connect the yellow wire to the anode and the white wire to the cathode.
2. The red wire in the cell box is anode and the black wire is cathode.
3. Test if the light works again after assembling the lampshade and the cell box.
