Using the keyboard and mouse

Setting

Plug the USB connectors connected to the keyboard and mouse into any of the USB ports (Type A) on the front or back of your computer.

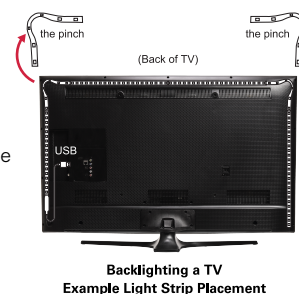

USB Connectors

The keyboard and mouse do not require any special installation or software. Your computer should detect and install them automatically, and your lights should turn on automatically.

If your computer does not automatically connect to the keyboard or mouse, try restarting your computer or checking the device settings in your computer's Settings or System Preferences panel.
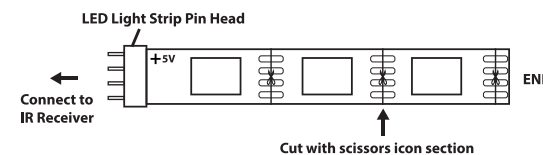

Setup the LED light strip

For best adhesion, the LED light strip is best mounted using only one attempt. For this reason, it's best to planout the setup before attempting to apply.

Take the following into consideration when choosin a location:
△ The LED light strip must be able to reach a USB powe source, such as the USB port on a computer or a 1.5A USB wall adapter (not included).
