

127X178MM

**GLOW IN THE DARK**

**DINO DIG SITE T-REX**

6+ Years

### INSTRUCTIONS

Dig like a real paleontologist! Unearth and assemble the skeleton of the T-Rex.

**Clay Block**  
Block of clay that stores dinosaur bones.

**Chisel**  
The primary tool you'll be using to dig out your dinosaur.

**Brush**  
This item will help you dust off your findings before assembly.

**START DIGGING!**

**Step 1:**  
Using the chisel and mallet, carefully dig into the clay block and carve out the dino hidden inside.

**Step 2:**  
During the digging process, use the brush to brush away any remaining clay or dust. Don't blow the dust away.

**Tip:** If you have a spray bottle, fill it with water and keep it close by to dampen the block for an easier dig. As an alternative, you can submerge the block into water for a minute.

\*\*\*Dispose of clay in the trash. Do not put clay powder into the sink or bathtub drain as it may clog.

**Step 3:**  
Gather all of the fossils and organize the dinosaur pieces.

**Step 4:**  
Assemble the dinosaur fossils and enjoy your toy!  
Find a place to display your discovery.

BATCH No. 10/21
