Laptop Stand with Fans RGB

To ensure optimum performance and safety, please read this instructions carefully before operating this product.

Weight capacity: 6.9kg

Operation

1. Take out the cooler from the packaging.

2. Find the small pad at the bottom of the product.

3. Take it out and turn the cooler to the front side.

4. Find 2 small holes around the LCD display control panel.

5. Insert the pad into holes.

6. Pull out the brackets at back and choose the angle you need from 7 adjustments.

7. Put your laptop (**Not included**) on the cooler.

8. Insert one of the cable USB connector into the laptop's USB port, and connect the other end of USB cable into the cooler's USB port, press the **power button** then the cooling fans will start to work.

9. Press light  button on LCD display control panel to change 10 kinds of light modes.

10. Press +/- **button** to increase/decrease fan speed.
