IMPORTANT SAFETY INSTRUCTIONS

READ AND FOLLOW ALL INSTRUCTIONS

Carefully read, understand, and follow all information in this user manual before installing and using the Filter Pump. These warnings, instructions, and safety guidelines address some common risks of water filtration systems, but they cannot cover all risks and dangers in all cases. Always use caution, common sense, and good judgment when enjoying any water activity. Retain this information for future use. In addition, the following information can be supplied depending on the Filter Pump type. Keep the instructions in a safe place. If instruction is missing, search it on the website www.bestwaycorp.com/support.

WARNING

- Electric installations should follow national wiring rules.
- The pump is to be supplied by an isolating transformer or supplied through a residual current device (RCD) having a rated residual operating current not exceeding 30 mA.
- The pump cannot be used while people are inside the pool.
- The supply cord cannot be replaced. If the cord is damaged the appliance should be scrapped.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.
- If instruction is missed, please contact with Bestway or search it in website: www.bestwaycorp.com

TECHNICAL SAFETY INSTRUCTIONS

- The appliance must be supplied by an earthed power source.
- Extension cords can't be used.
- Do not bury cord. Locate cord to minimize abuse from lawn mowers, hedge trimmers, and other equipment.
- This pump is for use with storable pools only. Do not use with permanently-installed pools. A storable pool is constructed so that it is capable of being readily disassembled for storage and reassembled to its original integrity. A permanently-installed pool is constructed in or on the ground or in a building such that it cannot be readily disassembled for storage.
- Using the pump with an unmatched electrical supply is dangerous and will result in catastrophic failure of pump.
- When working with electricity, turn the electrical power off at the circuit breaker and lock breaker door. Failure to do so will result in increased risk of shock, injury and possibly death.
- Do not remove the grounding prong or modify the plug in any way. Do not use adapter plugs. Consult a qualified electrician for any questions related to the validity of your plug's grounding. Handle the pump with care. Do not pull or carry the pump by the power cord. Never pull a plug from the outlet by yanking the power cord. Keep cord free from abrasions. Sharp objects, oil, moving parts, and heat should never be exposed to the filter pump.
- Read the instructions before using the appliance and installation/reassemble each time.
- Cleaning and user maintenance must be performed by an adult above 18 years old who is familiar with the risk of electric shock.
- It is necessary to have the plug accessible after installation of the pool.
- Atmospheric conditions may affect the performance and life span of your filter pump. Unnecessary wear and tear may occur during periods of cold, heat and exposure to sun. Whenever possible, shelter the pump from these conditions.
- It is important to ensure the factory equipped stopper plugs for the inlet and outlet ports replace the screens before removal or maintenance on the pump is attempted.
- Do not add chemicals in the filter pump.
- Don't plug or unplug the appliance if your hand is wet.
- Always unplug the appliance: on rainy days, before cleaning or other maintenance, and when leaving it unattended on holidays.
- When the appliance will be not used for long time, such as in the winter, the pool set should be disassembled and stored indoor.
- This product is not intended for commercial use.

SAVE THESE INSTRUCTIONS

ATTACHING A BASE

FOR 330GAL

IEC60335-2-41 TEST standard requires the filter pump to be vertically fixed on the ground or a base made of wood or concrete before use. There should be two holes 9 mm in diameter on the base, the space between which should be 127 mm. Put filter pump on the base and attach them together by fastening the bolts and nuts. All the base parts should weigh at least over 18 kg to prevent the pump from accidentally falling.

FOR 530GAL

IEC60335-2-41 TEST standard requires the filter pump to be vertically fixed on the ground or a base made of wood or concrete before use. There should be two holes 9 mm in diameter on the base, the space between which should be 159 mm. Put filter pump on the base and attach them together by fastening the bolts and nuts. All the base parts should weigh at least over 18 kg to prevent the pump from accidentally falling.

FOR 800GAL

IEC60335-2-41 TEST standard requires the filter pump to be vertically fixed on the ground or a base made of wood or concrete before use. There should be two holes 9 mm in diameter on the base, the space between which should be 166 mm. Put filter pump on the base and attach them together by fastening the bolts and nuts. All the base parts should weigh at least over 18 kg to prevent the pump from accidentally falling.

SETUP

CHECK LIST

To check the parts included in the box, consult the part list inside this manual. Verify that the equipment components represent the model that you had intended to purchase. In case of any damaged or missing parts at the time of purchase, visit our website bestwaycorp.com/support.

CHOOSE THE CORRECT LOCATION

Place the Filter Pump on a solid and level ground; it must be positioned on the same level as the base of the pool. If the Filter Pump is in an upper or lower position than the base of the pool, the performance and life span of the Filter Pump can be compromised. The pool and the Filter Pump have to be positioned in an area with adequate drainage and easy access for maintenance operations. Never place the Filter Pump in a area that may accumulate water.

INSTALLATION

- For the installation instructions, refer to the illustration steps  inside the manual. Drawings are for illustration purposes only. May not reflect actual product. Not to scale.
- Bestway will not be responsible for any damage caused to the Filter Pump due to mishandling or failure to follow these instructions.
- It is imperative to check that the hydraulic connectors are not obstructed.
- Do not dry run the Filter Pump. Make sure both the pool's inlet and outlet valves are fully covered by water before operating the Filter Pump.

MAINTENANCE

- Make sure that the Filter Pump is unplugged before any maintenance.
- For the maintenance instructions, refer to illustration steps  inside the manual. Drawings are for illustration purposes only. May not reflect actual product. Not to scale.
- To optimize the Filter Pump performance and for sanitary reasons, we suggest replacing the filter cartridge with a new one every two weeks.

STORAGE

- Remove all accessories; be sure that Filter Pump, hoses and debris screens are completely clean and dry before the storage. If all the parts are not completely dry, mold may result.
- Before storage, remove and dispose of the filter cartridge.
- We strongly recommend disassembling the Filter Pump when the environment temperature is below 10°C / 50°F.
- Store the Filter Pump in a dry place with a moderate temperature between 10°C / 50°F and 38°C / 100°F.
