Assembly instruction

Step 1, Insert part 2-axle into the hole of part 1 (**Note:** insert from the side with metal plate), Use the wrench to secure the axle with part 3 and then part 4.

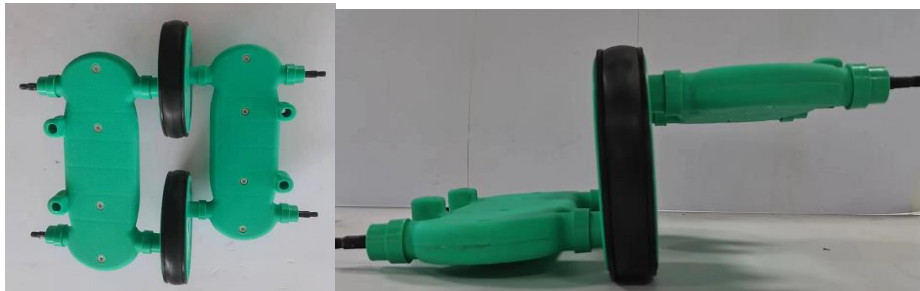

Step 2 And then the same for the opposite side hole, insert the axle to the hole (note: insert from the side with metal plate) and secure it with part 3 and part 4.

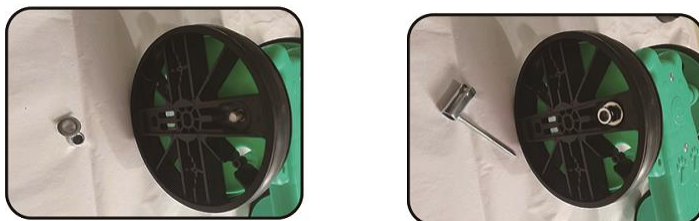

Step 3, assemble the middle wheel and the two other axles as step 1 to step 2.

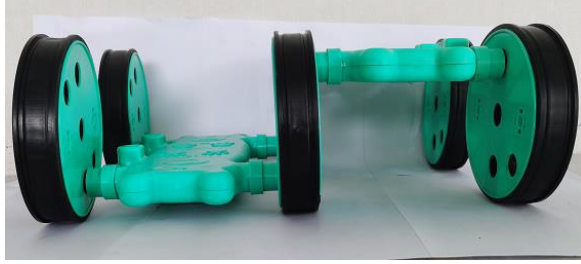

Step 4, insert the axles into the pedals, like the picture shows, make sure the pedals are level

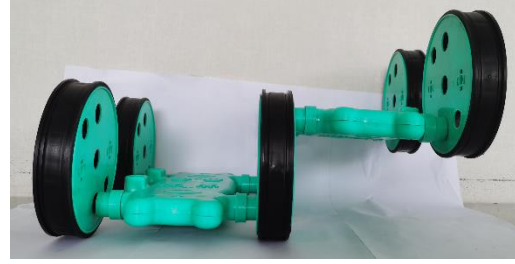

Step 5, insert the axles into the side wheels, from the hole with metal plate, and secure them with part 3 and then part 4.

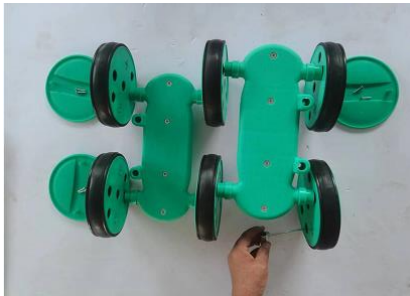

Correct assembling

incorrect assembling

Step 6, secure the side wheel covers to the side wheel with part 9.

Step 7, put the foam on the handles, it will be much easier to lubricate the tube with some soapy water

Step 8, secure the handles to the pedals with the bolt-part 12.

Assembling finished, before you start using this product, please make sure all screws are tight. Protective equipment should be worn, adult supervision required at all times.
