

Make Your Own Easter Bonnet

1. Stick the self-adhesive foam dots onto the bonnet band as shown in the picture above.

2. Make the bonnet band into a round shape and stick both ends together. Make sure the coloured side is facing outside.

3. Fold the top edges toward the inside of the bonnet. Then fold the bottom edges toward the outside of the bonnet. Make sure that the adhesive foam pieces are facing up.

4. Put the brim through the bonnet and press it firmly against to the self-adhesive foams on the bottom of the bonnet.

5. Stick the lid on the top edges. Then turn the bonnet upside down and press it firmly to make sure the lid and the bonnet sticks properly.

6. Use the bunny, ribbons, pom poms and stickers to decorate the Easter bonnet.

7. Now your Easter bonnet is finished.
