

DIY Air Dry Clay Vase

Kit Includes

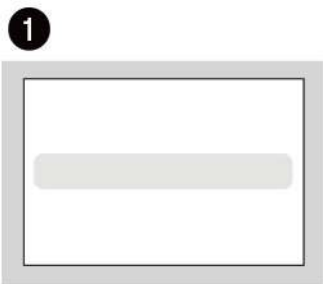

- › 1 x 500g air dry clay
- › 5 x acrylic paints
- › 1 x paint brush
- › 1 x instruction sheet

Tips

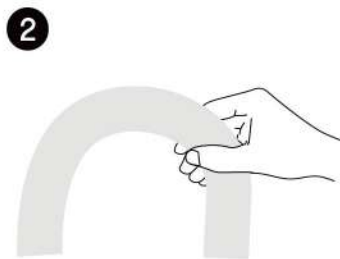

- Set up your workspace with a place mat to protect your surface.
- Use water to smooth your clay.
- Vase cannot hold water. Perfect for dried flowers.

How To Make A Vase

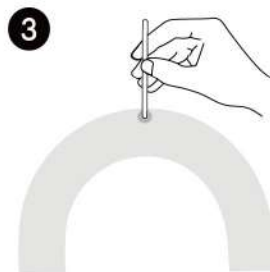

1.

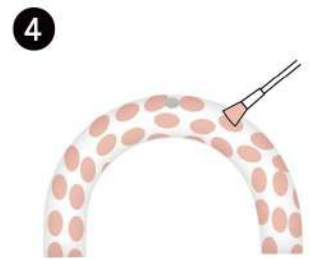

Take half of the clay and roll it into a long shape with your hands.

Flatten the ends and gently bend it into an arch shape as shown. Use some water to help shape the clay. Test that your vase stands up on its own.

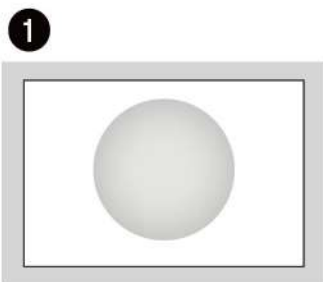

Using the end of the paint brush, make a small hole at the top of the arch. Use some water to smooth the clay, then lay the vase on a flat surface to dry overnight.

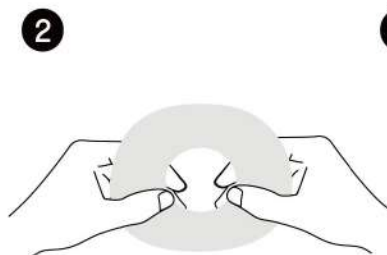

Paint the vase with your desired pattern and leave to dry. Once complete, use the vase to display dried or fresh flowers.

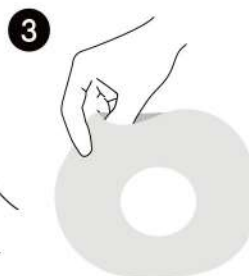

2.

Take half of the clay and mould it into a sphere.

Use your fingers to gently press a hole in the centre of the sphere. Mould the clay into a donut shape as shown.

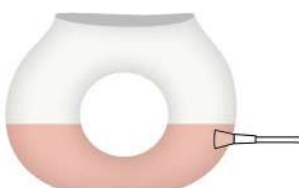

Make an opening at the top of the donut shape and press down inside to hollow out the first side, about half way down. Repeat on the second side.

Mould the lip at the top of the vase and flatten the base. Test that your vase stands up on its own. Use some water to smooth the clay, then lay the vase on a flat surface to dry overnight.

5.

Paint the vase with your desired pattern and leave to dry. Once complete, use the vase to display dried or fresh flowers.
