

Polymer Clay Earrings Instruction Manual

Kit Includes

- › 8 x polymer clay colours
- › 5 x shape cutters
- › 2 x clay tools
- › 1 x roller
- › 4 x pairs of gold studs with backers
- › 3 x pairs of silver hoops
- › 12 x gold metal jump rings
- › 1 x instruction sheet

Tips

- › Wash hands before beginning and lay down a clean, smooth work surface.
- › Baking time can vary depending on the oven and clay thickness. Take care to avoid burning the clay.
- › Use a protective mitt or similar to remove the tray from the oven and do not handle the hot clay. Leave the clay to cool and harden on the tray.
- › Add holes in clay pieces before baking.
- › Each pair of earrings requires 2 matching shapes.

Guide Image

How To Shape Polymer Clay Earrings

1

Use the roller to roll out a clay slab to around 5mm thickness. Ensure the slab is large enough to cut at least two matching shapes.

2

Add small pieces of coloured clay to create your desired pattern. Use the roller to press them firmly into the base layer and flatten the slab to around 3-4mm thick.

3

Press the shape cutters into the clay to cut the earring shapes. Each pair of earrings needs two pieces of the chosen shape.

4

Make holes for the hooks and rings with the pointed end of the wooden stick. Cut a variety of shapes and colours with the remaining clay and cutters.

How To Bake Polymer Clay Earrings

1

Preheat the oven to 120° Celsius. Place clay on a tray lined with baking paper. Bake for 15 minutes. Baking time may vary depending on clay thickness. Carefully remove from the oven and allow to cool before touching.

How To Make Polymer Clay Earrings

1

Choose matching clay shapes to make a pair of earrings. Open the jump rings and join your desired earring design to the hooks or simply slip clay shapes onto the hoops to complete a pair of earrings.
