### STEPS

Start by covering your work area with some newspaper or scrap paper. Make sure to wear an apron or old clothing to protect your clothing from mess.

- 1** To create your nail polish, pour 1/3 of nail polish base into the measuring cup. You may need to give the bottle a little squeeze to help get it out. Sprinkle one mica powder colour into the cup and mix using the spoon. Make sure the colour is mixed in thoroughly.
- 2** Use the pipette to squeeze up the nail polish colour and pour into one nail polish bottle.
- 3** Repeat steps 1-2 for each nail polish colour. Wash the measuring cup between each nail polish colour.
- 4** Shake each bottle well and your nail polish is ready to apply to nails once nails are dry.
- 5** Use the nail stickers to decorate your nails and your nail polish bottles.

The concentration of individual ingredients in the product will vary based on how it is made/mixed.
