› 5 x paint pots
› 1 x paint brush
› 1 x thread
› 2 x needles
› 1 x instruction sheet

Tips
› Ensure the paint is completely dry before painting the next colour.

## Guide Image

How To Make A Paint & Stitch Keyring
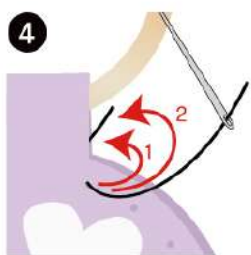

1

Begin painting the base with your desired paint colour, leaving it to dry.

2

Continue painting your desired pattern using remaining colours, leaving paint to dry between each colour.
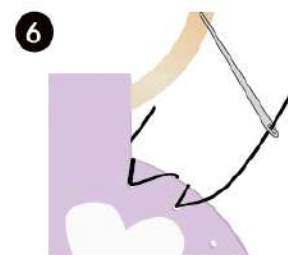

3

When the paint is completely dry, thread the shape through the keyring.
Then fold the faux leather as shown.

4

To join the keyring, take a needle with thread and thread it through the 1st hole at the top from back to front, leave a small tail. Then loop the thread again, making a second stitch in the 1st hole from back to front. Pull the thread tight and tidy the tail.

5

Take the needle with thread and stitch through the 2nd hole of both pieces from back to front, repeat to make a second stitch.

6

Pull the thread tight.

7

Repeat steps 5-6 to sew all the stitch holes. Repeat step 4 to finish the last hole. Trim the excess thread and leave a small tail. Hide 2 tails from 2 ends to complete the keyring. Follow the instructions to make all 3 keyrings.
